Long term coin holder  
(2 types)**

- 1. Buy coin**
- 2. Signal set up**
- 3. In general you leave it as it is, but you might escape some dips or do arbitrage (article & video)**

# Long term coin hold step 1: Buy coin

## Usual way

1. Deposit FIAT to your exchange account.
2. Do quick analysis when is best to buy.
3. Sign in to your exchange.
4. Setup buy order or wait and check all the time when will it happen.

## Palma way

1. Use /coinPrice to check on which exchange the price is lower.
2. Transfer FIAT to lowest exchange.
3. Do analysis when is best to buy.
4. Setup /diff signal.
5. Go do whatever you want - when the notification comes, check if it is the right time - adjust the strategy as you go - **execute on the go** - while living your life.

# Long term coin hold step 2: Signals setup

## Usual way

?

## Palma way

1. Setup /diff signal for other exchange 0.5% (for example)
2. Setup /abs signal for selected exchange.
3. Setup /diff signals for highest exchange (or other).

# Long term coin hold step 3: Follow the price

## Usual way

1. Come home late at night
2. If you remember and have the energy
3. Sign in to your exchange and check the price

## Palma way

1. Setup additional signals for other coins.
2. When dips happen, all the market is going down - that is why it is good to have at least 3 signal for other coins as well.
3. Do **arbitrage** in the meantime.
